

A Touch of Elegance

Elegance

Elegance Digital Motion Detector
(DG483)

Elegance

Art in Motion

With its timeless design, the Elegance motion detector can seamlessly integrate into any decor. Its refined styling and discreet size conceals an advanced dual element digital motion detector. With proven performance and reliability, Elegance provides the security you need without the bulkiness of common detectors. Cutting-edge technology united with harmonious design. Elegance.

Advanced

Elegance motion detectors give you the latest technology available for superior accuracy. Its patented Auto Pulse Signal Processing and Digital Detection ensure exceptional detection precision. Its Automatic Temperature Compensation also means that the detector performs consistently well in a wide variety of environmental conditions.

Reliable

Elegance motion detectors have built-in false alarm immunity to give you trouble-free, reliable performance. Its built-in digital shield guards the Elegance against common sources of false alarms and a unique lens design protects it from white light interference. With Elegance you can have complete confidence in your security system.

Proven

Elegance offers you advanced technology with proven effectiveness. Our detectors are individually tested to ensure the highest quality performance and put through a battery of tests to guarantee you have the best protection available.

Elegant Design, Reliable Security

- Unique simple design.
- Small size 8cm x 5cm x 3.5cm (3in x 2in x 1.4in)
- Patented Digital Detection for superior false-alarm immunity.
- Patented Auto Pulse Signal Processing for precision detection.
- Automatic Temperature Compensation for superior stability.
- Additional false-alarm immunity with white light protection, digital shield and plastic guard.
