

When Protection
is All That Matters

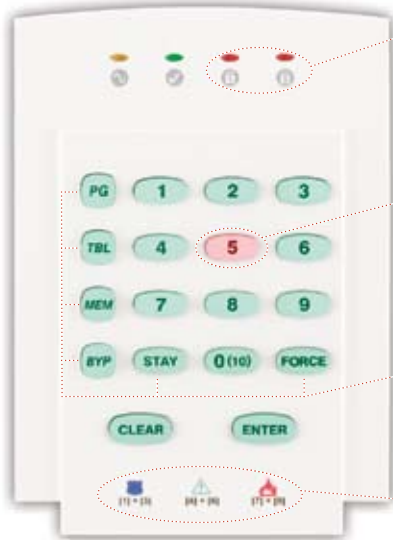

S P E C T R A[®]

5- to 16-Zone
Expandable Security Systems

Spectra's user-friendliness and incredible functionality make it the best security system in its class.

Designed To Meet Your Needs

Spectra is designed to meet all your security needs, even if they change along the way. Models range from 5 to 16 zones and can always be expanded by adding digital motion detectors, wireless technology or a voice-assisted arm/disarm module.

Two Systems in One

One Spectra panel can provide protection for two independent areas at one location. Secure your house, as well as your home office or basement apartment, and control both distinct areas conveniently from one keypad.

Instant Zone Status

Determine the status of any of your protected areas or zones with one quick glance at the Spectra keypad. For example, if zone 5 is open, the [5] button lights up. Spectra keypads provide instant, easy-to-read zone status for your convenience.

One-Touch Button Activation

Spectra makes controlling your system easy. Arm, bypass or even activate light switches, garage doors and more. All the main functions can be activated with the touch of a button.

Panic Signal Monitoring

Simply press two buttons to send one of three panic signals to a monitoring station. This assures assistance in case of fire, medical emergency or security breach.
